

ATENCIÓ:

Annex al formulari de sol·licitud d'ajuts per donar Suport a les activitats dels Grups de Recerca (SGR 2017)

Opció d'avaluació científica de grups

Aquest document només és vàlid per annexar-lo, en format PDF al formulari SGR 2017

*Annex to the application form of grants to support the activities of the
research groups (SGR 2017)*

Group scientific assessment option

This document is only valid for attaching in PDF format to be application form SGR 2017

Dades del/de la coordinador/a del grup de recerca

Coordinator Details of research group

Nom / Name MONTSERAT	Primer cognom / First surname PALLARÈS	Segon cognom / Second surname BARBERÀ
NIF/NIE/Passaport / Id/Passport [REDACTED]	Adreça electrònica / e-mail address montserrat.pallares@uab.cat	Telèfon / Phone number [REDACTED]

Dades del grup de recerca

Details of research group

Nom del grup i acrònim, si escau / Name of group and acronym GRUP DE RECERCA EN GEOGRAFIA APLICADA	Modalitat / Modality GRC - Grup de Recerca Consolidat
Universitat/centre/institució / University/Centre/Institution UNIVERSITAT AUTÒNOMA DE BARCELONA	

A) Producció científica més destacada pel grup

Noteworthy scientific production by the group

A.1) Detalleu, seguint el model proposat, la selecció de la producció científica del grup indicant, com a màxim, les 15 publicacions més destacades del grup. Poden ser o bé 15 articles en revistes indexades en bases de dades internacionals, o bé 15 llibres o capítols de llibres de recerca publicats en editorials de prestigi i impacte internacional, o bé una combinació de 15 publicacions d'aquests dos tipus (articles i llibres o capítols). Feu la selecció d'aquests 15 millors outputs del grup tenint en compte l'impacte dins de l'àmbit i l'autoria de les publicacions que seleccioneu i atenent els membres del grup. Podeu incloure els articles i els llibres o els capítols publicats pel grup durant el període comprès entre l'1 de gener de 2014 i la data de presentació d'aquesta sol·licitud / *Following the template, list below a selection from the group's scientific production, indicating up to a maximum of 15 of the group's most noteworthy papers. They can be either 15 articles in journals indexed in international databases, or 15 research books or chapters of books published by publishers of international renown, or a mix of 15 papers of the two types (articles and books or chapters). Select the 15 best treatises by the group according to their impact and authorship of the selected works within the field and bearing in mind the group members. You may include papers and/or books or chapters of books published by the group between 1 January 2014 and the date on which this application is made.*

Nota:

Assenyaleu amb negreta els autors de l'article que són membres del grup. Consigneu els índexs d'impacte corresponents a l'any de publicació de l'article o bé indiqueu altres índexs de qualitat relatius i en tot cas propis del vostre àmbit. Copieu i enganxeu el model proposat tantes vegades com us siguin necessàries segons la vostra activitat científica i fins a un màxim de 15 articles, 15 llibres o capítols o la combinació d'aquests dos tipus de publicacions. *Put in bold the names of authors who are group members. Include impact factors for the article's year of publication or give other quality indices relative to your field. Copy and paste the template as many times as necessary, up to a maximum of 15 papers or a maximum of 15 books/chapters or a mix of both.*

B) Captació de recursos per part del grup

Resource acquisition by the group

Detalleu, seguint el format proposat, els 10 projectes de recerca competitius més destacats. Detalleu, també, els 10 contractes o convenis no competitius més destacats aconseguits pel grup amb empreses o administracions. Podeu incloure els projectes i els contractes o els convenis aconseguits pels membres del grup durant el període comprès entre l'1 de gener de 2014 fins a la data de presentació d'aquesta sol·licitud, o bé que estiguin vigents (amb independència de quan s'han aconseguit) / *Using the proposed format, list the 10 most noteworthy competitive research projects. List also the 10 most noteworthy non-competitive contracts or agreements with companies or government agencies. You may include projects or contracts/agreements acquired by group members between 1 January 2014 and the date on which this application is made, or that are currently in force (regardless of when they were acquired).*

Nota:

Copieu i enganxeu el model proposat tantes vegades com us siguin necessàries fins a un màxim de 10 projectes i 10 contractes / *Copy and paste the template as many times as necessary up to a maximum of 10 projects and 10 contracts/agreements.*

C) Organització del grup

Group organisation

C.1) Expliciteu els reptes científics o objectius estratègics del grup per als propers 3 anys tenint en compte que estiguin dirigits a consolidar, mantenir o incrementar la recerca d'excel·lència dins el vostre àmbit, així com la internacionalització i la transferència de coneixement. **(2 pàgines com a màxim)** / State clearly the scientific challenges or strategic objectives for the next 3 years, taking into account the fact that the aim is to consolidate, maintain or increase research of excellence in your field, internationalisation and increase knowledge transfer (maximum 2 pages)

Applied Geography (AG) is a long established group, which since 1994 all members have worked in collaboration. Joint activity is conducted under specific challenges and strategic objectives, with several complementary topics enhancing mutual strengths. Despite AG's long history, our fundamentals have adapted to new societal challenges, learning from positive and negative research results, and from discussions with diverse colleagues.

The **strategic objective of AG** for the next 3 years is to increase research excellence, internationalization and knowledge transfer (see specifics on Part C4), by strengthening internal collaboration and increasing publishing in top academic platforms, transferring results to society and stakeholders, and diffusing conclusions to civil society (both private and public), under the **following structural topics**: quality of life, biodiversity, sustainability and risks.

Social science is now multidisciplinary and multi-focused. EU, ERC, and important research programs prompt a more inclusive interpretation of social matters, territories and topics. This AG group strategy is to be **interdisciplinary** (with outside collaborations, and from within, we embrace the many approaches of Geography), **international** (with collaborations with individuals and groups) and **interuniversity** related (with competitive coordinated projects). This strategy is aimed at achieving the highest frontiers of research and science.

AG is organized according to **3 research lines** (see Figure 1).

Line of Research 1 (LR1) Environmental dynamics in natural landscapes influenced by natural and human factors (Human landscape on ecological systems, climate change) (Topics addressed: biodiversity, sustainability/risk).

Line of Research 2 (LR2) Urban dynamics in high and medium density areas (Allocation of services and green urban areas, impacts on cities (Big Data) and in urban interphase territories (wildland fires), social economic activity and economic spaces) (Topics addressed: quality of life and biodiversity).

Line of Research 3 (LR3) Structural systems dynamics relating population and sustainability (Mobility, public spaces, health, ageing and infant population, natural ventilation, soil sealing and energy saving, noise). (Topics addressed: quality of life, sustainability/risk).

About the large scope of the group's knowledge and global societies and spaces. In the 21st century, activities and problems are very spatially spread, and more global solutions are required (Global Megatrends, European Environmental Agency 2015). Air pollution originating in a region is transported to, and affecting another. The original dichotomy of rural-urban space is now a continuous path and they now require holistic consideration: the city without boundaries, and the rural as a continuum of more urban territories. This is because problems have no frontiers and true solutions are without borders. For instance, climate change affects population everywhere, but the causes of this climate change are linked to environmental dynamics of oceans and mountains, which are simultaneously affected by urban populations exploiting these environments. Our research lines work at different scales and population density degrees. In this sense, the concept of urban and rural is a segment, along which are variations in population density. Under this scenario, the AG group will work toward studying problem origins and the resulting factors. We propose solutions through sustainable operations that broadly affect society. In addition, our objective is to allow empowerment of users and citizens to play a bigger role in this transition and the management of territories in transition.

Our AG **structural strategic objective** is to analyze the organizational dynamics of quality of life, as a concept integrating the main topics in spaces of different population density, which represents a complexity challenge in strategic management. Our AG **scientific challenge** is to analyze the main

factors and the interrelations associated with them, and to transfer and disseminate results for management and strategic policy driven institutions.

LR1. Environmental dynamics in natural landscapes influenced by natural and human factors.

Specific objective: To analyze the human influence to biodiversity and climate change.

Members: 1, 2, 8, 10, 11, 12, 13, 14, 15, 18, 20 (see C5).

1. **Human landscape on ecological systems.** How long have natural systems been managed by humans? When did human presence become significant, and to what degree has human impact influenced natural dynamics and biodiversity? For instance, environmental geohistory incorporates value-added dimensions and empowers socioecological systems, as well as contributing to landscape management (Biosphere Reserves, National and Natural Parks) for a better quality of life.
2. **Climate change.** Climate processes have conditioned ecological systems and modified human activities and behaviors. Long-term data is needed to better discern and characterize current patterns locally, regionally, and globally. For example, Sea Surface Temperature (SST) of the last 2,000 years (pre- and post - anthropogenic interglacial climate) helps calibrate and parameterize models used to foresee 21st century impacts on oceanic and atmospheric processes (e.g. precipitation). These bear directly on one of the most important factors for human population, availability of drinking water.

LR2. Urban dynamics in high and medium density areas. Specific objective: To understand the processes for changes taking place in the spatial organisation of urban and urbanized territories. Members: 1, 4, 5, 9, 16, 17, 18, 21, 22, 23 (see C5).

3. **Services and green urban areas.** Allocation of services (schools, health) and “green infrastructure” are considered of increased importance, because the former increases the supply of “good benefits” to population, decreasing spatial injustice; and the latter are nature based solutions for urban environmental problems and public health. i.e., flood protection, air quality, contra resting climate change effects, such as to reduce air pollution, and regulate the water cycle. The amount of services and their availability to populations are key components in the urban context.
4. **Impacts on cities (Big Data) and in urban interphase territories (fires).** Most global cities base their economic activities on selling their attractiveness and capturing global demand. Then the concentration of tertiary activities and visitors in certain areas aggravate local quality of life, diminishing sustainability by emitting negative external scale economies. Analyses based on Big Data (Panoramio, Flickr and Twitter) offer better understanding of preferences and could delineate those factors for future policy making of how to manage cities. One of the major problems caused by suburbanization is the exposure of populations to wildfire risks. Research on causes, management and prevention are vital for public authorities. Social economy and co-working spaces sprung from last economic crisis impact on cities increasing competitiveness and changing human relationships. Rural farming has added value to rural areas and increased quality of life specifically to the handicapped population.

LR3. Structural system dynamics relating population and sustainability. Specific objective: To interpret urban organization and sustainable development understanding how population use and adapt structural systems to improve their urban living. Members: 1, 3, 6, 7, 19, 21, 22, 23 (see C5).

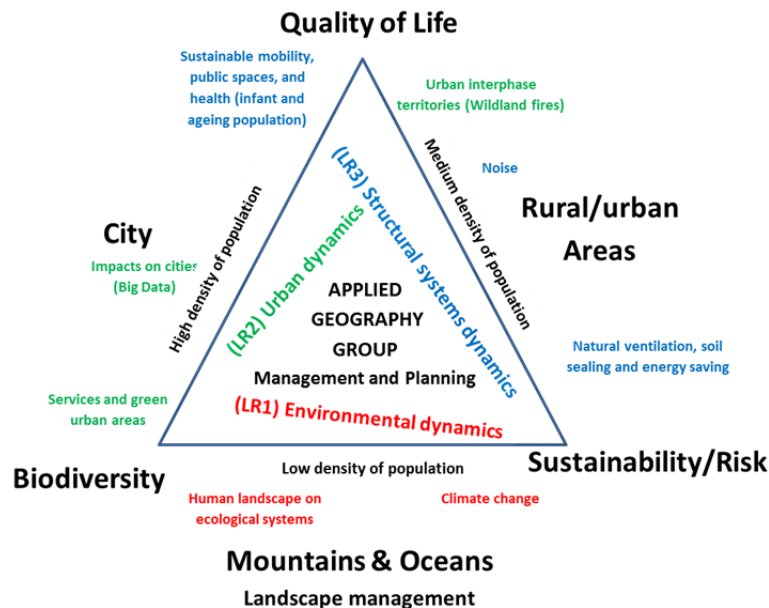

5. **Sustainable mobility, public spaces, and health (infant and ageing population).** Walkability and alternative modes of transportation of infants and aging population can influence health, generate different mobility patterns, and modify use of public spaces. Research focused on generating sustainable strategies implement quality of life of territories.
6. **Natural ventilation, soil sealing and energy saving.** Insolation and winds impact the morphology of cities, as well as the degree of sealing, with impact on the urban heat island effect and disruption to the water cycle. Research based on high resolution satellite images provides quality assessment measures of soil sealing and insolation, which give valuable bases for research.
7. **Noise.** The impact of noise in population is an increasing concern for policy makers and health practitioners. Cultural differences help define perception of a noisy environment. For instance, Mediterranean countries are more permissive than Northern European countries. Levels of population exposure to different noise sources and noise bands (Dutch Institute for Public Health

and the Environment) inside as well as outside cities has given results of noise limits on health impact in Europe.

C.2) Detalleu l'estructura organitzativa del grup, d'acord amb la seva trajectòria conjunta, els canvis ocorreguts en la composició del grup, i en relació als reptes científics o als objectius estratègics per als propers anys. Podeu fer servir cronogrames, taules i organigrames (**3 pàgines com a màxim**) / *Detail the structure of the group according to its joint activity, changes occurred in the composition of the group, and its relation to scientific challenges and strategic objectives for next years. You may use timelines, tables and organisation charts (maximum 3 pages)*

Structure of the group, joint activity. Continuing the path adopted during the period 2014-2106 (2014SGR1090) this 2017-2019 proposal has similar grounding principles. The Applied Geography SGR's projects involve management and planning of the territory, from natural, socioeconomic and socio-cultural approaches; embracing their corresponding environmental, productive and social processes. To this end, the organizational structure of the group reflects the linkages among diversity in the thematic approaches; which are at the same time complementary and different. This is a strategic line we pursue because the scientific structures must be investigated at different geographical spaces and at different temporal and geographical scales. To this end, we establish linkages of research among the AG members as can be seen in Figure 1, and specified in section C1.

Figure 1. Main structure of thematic lines of the Applied Geography Group (2017-2019)

The organizational structure of the group has a hierarchy constructed for a maximum working efficiency. At the first level the PI (Dr. Pallares-Barbera) of the project coordinates the group, ensures the following: (a) The coordination of the lines of research, expressed in the previous section (C1); (b) Watches over to increase the group's joint strategy and favoring the transfer to public and private agents; (c) She is in charge of adjusting the research to RRI perspective and of the communication and dissemination of research (C3); Encourages the search for financing and the quest for talent.

In a second hierarchical level there are the PIs directly responsible for each Research Line. These have the primary responsibility to achieve the group's partial objectives, publish their research in prestigious magazines and publishers, seek funding in their thematic area and ensure the composition of the subgroup encouraging the continuing education of doctors.

The good performance of this structure is guaranteed by a meeting twice a year between the PI and the ones responsible for the research lines. A first meeting is organized at the beginning of Fall. It serves to plan

expenses and objectives of the academic year. A second meeting in the second semester serves to adjust the pace of the objectives and presentation of partial results. Individually, each area manager meets at any time of the year with the PI of the SGR to manage the day to day and possible opportunities throughout the year.

The main changes in the composition of this group over the one of the previous period are related to the increase in the number of doctors that join the group: 16 to 23 doctors. This has been possible thought the incorporation of younger personnel; which implies a rejuvenation of the group and energies in order to maintain the quality of the SGR.

In addition, a postdoctoral researcher Dr. Raquel Cunill, which is a JIN (Jóvenes Investigadores) Program of the MINECO, has been incorporated. This contributes to growth the expertise in historical forest fires and pedoanthracology, between LR1 and LR3.

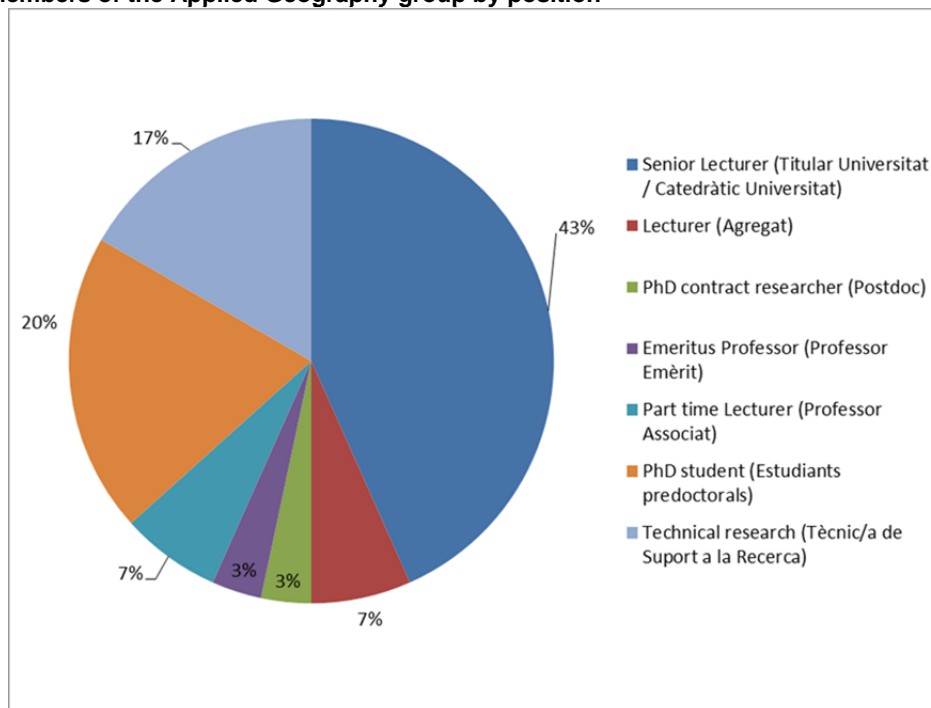

Besides, there has been an incorporation of researcher Núria Blanes (INTERFASE-UAB) with skills and experience in noise and green areas in cities. She is also an expert in international projects, FP7th, H2020; she will work in between LR2 and LR3.

There has been a spin-off of Dr. Antònia Casellas; she will form a new SGR group.

Since the last SGR the structure of the group has been strengthened (Figure 2).

Fifty percent of the group members are civil servants or interim associates and the rest includes a wide range of figures that combine the expertise of emeritus professors, postdoctoral researchers and a large number of Ph.D. students (6 scholars) and research support technicians (5 members).

Figure 2. Members of the Applied Geography group by position

The current and future joint trajectory of the group is shown in Figure 3. The research and other academic relationships between the group doctors (23 doctors from a total of 30 members) are represented by the **black X's**. For the future agenda, in order to grow in a fully integrated and coordinated way, Dr. Pallares-Barbera (number 14), the project PI, plans to (a) to increasingly strengthening the links among to all members; (b) specifically enforcing the potential some lines, the **red X's**). The AG group future challenges will go through consolidating the trend of working the diversity to get synergy for stronger results benefiting the management and territorial planning which the AG group has presented.

30. Núria Blanes Guàrdia (NBG), UAB LR 2, LR 3 nuria.blanes@uab.cat

C.3) Destaqueu, quines accions realitzades o previstes pel grup referents a la inclusió de la perspectiva RRI (gènere, participació ciutadana, accés obert, ètica, educació científica i governança) en la concepció, l'inici i el desenvolupament de l'activitat i la transferència dels resultats de la recerca del grup i en les accions de divulgació científica (**3 pàgines com a màxim**) / *Highlight which action the group takes to include RRI (gender, public participation, open access, ethics, scientific education, governance) in the conception, initiation, development and transfer of the results of the group's research and in the scientific dissemination of these results (maximum 3 pages).*

Actions taken by AG to include RRI in the conception, initiation, development and transfer of the results and the scientific dissemination. The Applied Geography group is by its nature embracing many of the RRI perspective. This has been done during a long period of time and it is increasing as the group advances in research. The AG group is including in its core objectives an open science and innovation approach that tackles societal challenges in a polyedric perspective.

Responsible Research and Innovation (RRI) of the AG group has very deep implications. In this sense, we have worked with societal actors (researchers, citizens, policy makers, business, third sector organizations) during the whole research and innovation process in order to better align both the process and its outcomes with the values, needs and expectations of society. Major challenges that society faces today, such as climate changes and ageing population are part of our research and our goals, as it is specify in section C1 of this form. Through all AG life the group increasingly has incorporated a critical thinking, pursuing to contribute to social and economic prosperity of spaces. The knowledge based society requirements intrinsically linked public and private agents and civil society are been participating in all phases of the group progress.

Our network of society agents has been very decisive to understand the needs, values and expectations of society and our research has been, directed to increase progress in life. Our general goal in pursuing this research has been to involve social and ethical controversies regarding our topic. Under this base, we try our research to be open and transparent at all levels; it needs to be reflective and reactive to social needs and inclusive in its expectations. Our main topics, meaning quality of life, sustainability and risk are very much engaged in building desirable futures.

We do this by engaging all actors and decisions, from civil society organizations, private sector and policy makers to our research in the academic group. We hope our results would be directed to build policies towards a more inclusive, smart and sustainable society, which focuses on the grand challenges that we face.

1. Actions taken by AG to include RRI gender

The parity gender in our group is 33,3% women, which has been increasing as a strategy to incorporate the most balance gender vision and goals. The PI is a woman, and most of the managers of RL are women.

In our research we take into account the variable gender as an important one for the analysis; and in the CVs of the members are many publications on gender and social capital as well as women in political organizations.

2. Actions taken by AG to include RRI public participation

Public participation takes different forms: (a) in the data recollection. Neighborhood associations, civil leaders, unions have participated through in-depth interviews, focus groups, field trip knowledge acquisition. For instance, our study of the 22@Barcelona different agents has given us information; we made seminars presenting our results, and engaging in fruitful discussions that allow research to tackle a step forward. (b) Our results have been presented in different platforms and discussed by different local and institutional groups, nationally and internationally.

3. Actions taken by AG to include RRI open access

We are combining our publications to include open access data. Our data bases and working documents are archive in the Open Access repository in the UAB_DDD managed by the UAB library. Besides, the group has different tools to disseminate their research and make it available to society.

The different lines of the group have specific web pages with the information of the research carried out and in progress and that of the members that compose them. The addresses are:

- <https://agriculturasocialcat.wordpress.com/equip-de-recerca/>
- http://mobilitat.uab.cat/?page_id=102&lang=en
- <http://www.nycticorax.cat/>
- <http://grupsderecerca.uab.cat/economicgeography/>
- <http://geografia.uab.cat/interfase/>

It is expected that lines that do not have a website will create it in the coming months

With regard to the immediate dissemination of the group's activities to social networks, it is worth mentioning the existence of Twitter accounts: (@gramp_uab, @gemottuab, @GRNycticorax ...)

4. Actions taken by AG to include RRI ethics

For our AG objectives and related to ethic, we try to seek to resolve questions of human equity and spatial and environmental justice. Our network of societal agents has been very decisive to understand the needs, values and expectations of society and our research has been directed to increase progress in life. Our general goal in pursuing this research has been to involve social and ethical controversies regarding our topic. Under this base, we try our research to be open and transparent at all levels; it needs to be reflective and reactive to social needs and inclusive in its expectations. Our main topics, meaning quality of life, sustainability and risk are very much engaged in building desirable futures.

5. Actions taken by AG to include RRI scientific education

The members of the team drive and participate in courses organized in:

- Regulated degree courses, undergraduate courses.
- Master courses.
- Specific training courses for technicians: PAT Days of Social Agriculture, Forest Guidance Courses, Courses for secondary school teachers, conferences of the EIMUS (Iberoamericana Encuentro Iberoamericano de Movilidad Urbana), School Road Courses.

In addition, members of the groups are in the coordination and direction of different masters and seminars; such as Coordination of official Master's degrees (Master's Degree in Territorial and Population Studies, Interuniversity Master's with City Planning and Policy, Environment and Landscape, and Master's in Geoinformation (offered jointly with the ICC).

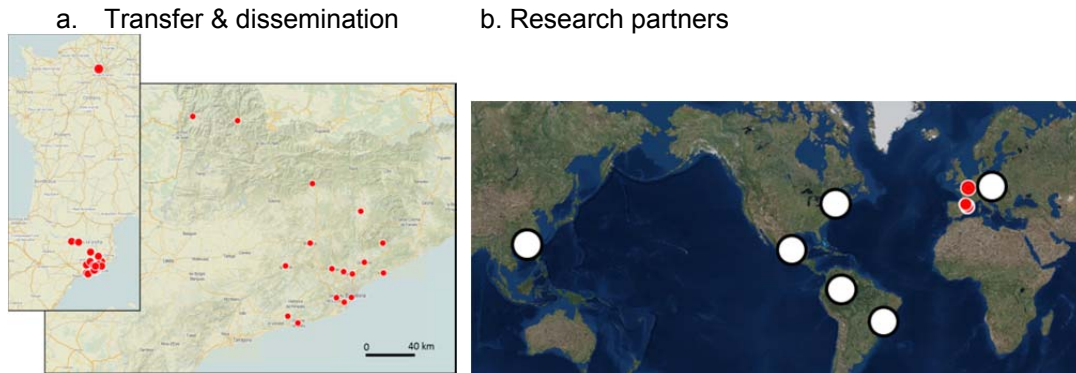

6. Actions taken by AG to include RRI governance

Our engaging in knowledge transfer (i.e., "the transfer of tangible and intellectual property, expertise, learning and skills between academia and the non-academic community." (Cambridge U, 2017)) has been linked to institutions, such as Diputació de Barcelona, through seminars at different stages of our research, which has provided an enormous input and feedback for our research and their daily work (See Figure 5. Map on transfer and relationships). We work together with other public administrations in the development of public policies such as the Observatory with the Besòs-Tordera Consortium for monitoring the socio-ecological cycle of the Tordera i Besòs river basin.

- Transfer and scientific dissemination of results (Figure 4)

OAs it has been said our engagement in knowledge transfer (i.e., "the transfer of tangible and intellectual property, expertise, learning and skills between academia and the non-academic community." (Cambridge U, 2017)) is wide. It is linked to institutions through seminars at different stages of our research, which has provided an enormous input and feedback for our research and their daily work. The scientific dissemination of results are linked with specific courses to society, such as the Programa d'Educació Ambiental, Comunicació i Formació (PROECA), Cursos d'Estiu d'Evolució del Paisatge de Gerdar i de Farrera, els Cursos Bojos per la Natura (dins del programa Bojos per la Ciència) - <http://pagines.uab.cat/illustraciocientifica/content/transfer%C3%A8ncia-de-coneixement-programa-proeca>. As well as the following transfer and dissemination relationships: Semminar Diputació de Barcelona.

Figure 4a and b. Applied Geography group research and innovation transfer, dissemination and research partners map

Red dots: Transfer & dissemination from AG group to societal agents.
 White dots: Research partners.

- **Conferences.** The dissemination of the group's research still has a different side by the hand of the numerous national, state and international conferences that have been made by the members of the group. In total there have been 114 and 85 international and national conferences, respectively, on quality of life in cities, acoustic pollution, global change, urban green and urban mobility. We organize jointly with the Federación Iberoamericana de Urbanistas the following "Seminario internacional "Pontevedra: una ciudad modelo. Premio calidad de vida urbana", (febrero 2015) Coordinación por parte de Pau Avellaneda y Montserrat Pallares-Barbera.

- **Press and general media.** The research carried out by the group has a great impact on the press, both written and audiovisual. In this area, it is important to highlight the different media scales that range from local press - regional and even from university campuses to national media. As mentioned, the presence of the group in the media has been from daily or weekly newspapers written to televisions and radios. The formats have been diverse: news about the results of the research, interviews with members and interventions based on specific problems about some aspects (such as episodes of large traffic congestions) (See Table 1).

Table 1. Summary of dissemination of results to communication media

Mass Media	Urban dynamics	Environmental dynamics	Structural System dynamics	Total
TV/Radio	5	3	2	10
Internet	76	20	14	110
Newspapers	5	4	2	11

- **Permanent dissemination headquarters.** Our group has been part of the founders of the International Center for Mediterranean Biosphere Reserves, promoted by the Unesco Castellet de Foix International Center.

C.4) Inclogueu en aquest apartat, també, les activitats de supervisió que els membres del grup facin a personal en formació que sobretot destaquen la capacitat formativa del grup en relació amb la transmissió a personal novell de coneixement i estratègies dirigides a fomentar l'impacte social de la recerca i la participació o el lideratge del grup en activitats formatives i màsters (**2 pàgines com a màxim**) / *Include also in this section any supervision undertaken by group members of staff in training and the group's training capabilities to transfer to new staff of knowledge and strategies directed at new lines of production of impact results and participation or leadership of training activities and master's degree courses (maximum 2 page)*

The Applied Geography group has **40 Master Thesis (TFM) and 66 Final Bachelor Papers (TFG)** in the period 2014-2017

Member Participation in the following Masters during the period (2014-2017):

1. Màster oficial en Estudis Territorials i de la Població (Dpt. de Geografia – Facultat de Filosofia i Lletres - Universitat Autònoma de Barcelona).
Members of the group that participate: Àngel Cebollada (Coor. until June 2017), Jordi Nadal (Coor. since June 2017) - Montserrat Pallarès Barberà, Anna Badia, Antoni F. Tulla, Enric Mendizábal, Joan Manuel Soriano, Albert Pèlachs, Esteve Dot and Ana Vera (2014-2015).
2. Màster oficial en Ciències Ambientals (ICTA - Universitat Autònoma de Barcelona).
Members of the group that participate: Carme Miralles Guasch (Coor. until May 2017) David Molina, Peter Graham Mortyn, Martí Boada and Àngel Cebollada.
3. Màster oficial en Geoinformació (since 2016) - Màster en Tecnologies de la Informació Geogràfica (1998-2016) - (Dpt. de Geografia – Facultat de Filosofia i Lletres - Universitat Autònoma de Barcelona).
Members of the group that participate: Joan Nunes (Coor.) and Anna Badia.
4. Màster oficial en Ecologia Terrestre i Gestió de la Biodiversitat (Dpt. Biologia Animal, Biologia Vegetal i Ecologia - Facultat de Biociències – Universitat Autònoma de Barcelona).
Members of the group that participate: Ramon Pérez, Albert Pèlachs (2015-2016).
5. Màster en Intervenció i Gestió del Paisatge (Universitat Autònoma de Barcelona). Members of the group that participate in the master: Anna Badia, David Molina, Albert Pèlachs, Antoni F. Tulla.
6. Màster Interuniversitari en Planificació i Polítiques per a les Ciutats, l'Àmbient i el Paisatge (Universitat Autònoma de Barcelona, Universitat de Girona, Università IUAV di Venezia, Università degli Studi di Sassari, Universidade Técnica de Lisboa). Members of the group that participate: Àngel Cebollada (Coor. until June 2017), Jordi Nadal (Coor. since June 2017), Anna Badia, Enric Mendizábal, Albert Pèlachs. Esteve Dot.
7. Docencia en el Máster Universitario en Patrimonio Histórico y Territorial (Universidad de Cantabria). Asignatura “Los Espacios Naturales Protegidos”. Members that participate: Juan Carlos Garcia Codron.
8. Programa de doctorado y Maestría en Políticas Ambientales y Territoriales. (Instituto de Geografía, Universidad de Buenos Aires) hi participa Carme Miralles.
9. Magister en Desarrollo Urbano (Instituto de Estudios urbanos y Territoriales Escuela de Arquitectura Pontificia Universidad Católica de Chile). Curso oficial de “Movilidad transporte y territorio”. Members of the group that participate: Carme Miralles.

10. Maestría en Movilidad Urbana, Transporte y Territorio (Centro Universitario de CuTONALA, Universidad de Guadalajara (México). Members of tht group that participate: Carme Miralles. (2014-2017).
11. Programa de post-graduación en Geografía Humana (Departamento de Geografía Universidad de Sao Paulo (UP) (Brasil)). Members of tht group that participate: Carme Miralles.
12. Maestría en procesos y expresión gráfica en la Proyección Arquitectónica-Urbana (Centro Universitario de Arte, Arquitectura y Diseño (CUAAD). Universidad de Guadalajara (México)). Members of tht group that participate: Carme Miralles.

Pre-doctoral members of the group in the period (ordered by the most recent):

Marc Sánchez Morales – Beca FPI – 18/04/2017 - 17/04/2021
Azahara Sillero – Beca FI – 01/04/2017 a 31/03/2020
Xavi Delclós – Beca FPU – 01/03/2015 a 28/02/2019
Guillem Vich – Beca FPI – 01/05/2015 a 30/04/2019
Monika Maciejewska – Beca FI – 01/03/2016 a 28/02/2019
Rafael Vicente Salar - Beca FPI – 01/05/2015 a 30/04/2019
Eloi Guinjoan Cesena– Beca FPU –01/04/2013 a 31/01/2017
Oriol Marquet Saradà – Beca FPI – 01/09/2011 a 1/10/20015
Miguel Ángel Castela Egido– Beca FI – 01/04/2011 a 31/03/2015

Visiting reserarchers (ordered by the most recent):

1. Azahara Sillero, COST Action TU 1306 “Cyberparks” Training School: co-creating of inclusive and digital mediated public spaces. Universidade Lusófona de Lisboa (Portugal), 13-16/02/2017. Topic: decision making and strategies in public spaces in relation to TICs, public management.
2. Guillem Vich, The University of Edinburgh (Edinburgh, UK), Topic: Active Mobility and Environmental Exposure, 1/10-30/11/2017. Funding: Ministerio de Economía y Competividad (Spain).
3. Xavier Delclòs Alió, Centre for Mobilities and Urban Studies at Aalborg University (Denmark), 15/08-15/10/2017. The research it was supervised by Dr. Daniel Galland, is to deepen in the temporal perspective of daily mobility and also to acquire a planning-oriented vision on this topic. Funding: Ministerio de Educación, Cultura y Deporte.
4. Azahara Sillero COST Action TU 1306 “Cyberparks”. Training School: enhancements: mediated urban landscapes. Aristotle University de Tessalonika (Grecia), 29/03-01/04/2016. Topic: open public spaces, sustainable urban development and TIC.
5. Guillem Vich, Universiteit Gent (Gent, Belgium), Topic: Spatio-temporal factors of urban mobility, 1/08 – 30/11/ 2016. Funding: Ministerio de Economía y Competividad (Spain).
6. Xavier Delclòs Alió, Department of Geography & the Environment at the University of Texas at Austin (United States of America) from 15/03-15/06/2016. Topic: supervised by Dr. Paul Adams, was to deepen in theoretical and methodological issues regarding smartphone tracking experiments regarding daily mobility patterns. Funding: Ministerio de Educación, Cultura y Deporte.
7. Rafael Vicente Salar, Instituto del Conurbano. Universidad General Sarmiento (Argentina).15/05-15/08/2015. Topic comercial garment district, economic geography. Funding: Ministerio de Economía y Competividad (Spain).

Grup d'acollida d'investigadors pre-doctorals amb altres finançaments per a la realització de tesis doctorals (Sample):

1. Daniel Montané “Anàlisi de les pautes de mobilitat saludable dels majors de 65 anys durant la crisi a la RMB” (Codir: Carme Miralles Guasch and Oriol Marquet).
2. Mónica Castañeda, Investigadora Predoctoral, Beca de postgrado per a estudis a l'estranger del Consejo Nacional de Ciencia y Tecnología (Mexico).

C.5) Expliqueu les col·laboracions amb altres investigadors o institucions de rellevància científica destacant sobretot les internacionals (**2 pàgines com a màxim**) / *Explain and mention collaborations between the group and other researchers or institutions of scientific importance, highlighting, above all, any international institutions. (2 pages maximum)*

Our important connections with international organizations (related to the international projects):

1. Montserrat Pallarès Barberà. Spain's representative for the Cooperation in Science and Technology (COST) Action. Member of the Management Committee Transport and Urban Development (TUD) COST Action TU **1306 Fostering knowledge about the relationship between Information and Communication Technologies and Public Spaces supported by strategies to improve their use and attractiveness (CYBERPARKS)**
http://www.cost.eu/domains_actions/tud/Actions/TU1306
2. Montserrat Pallarès Barberà. Spain's representative for the Cooperation in Science and Technology (COST) Action. Member Substitute of the Management Committee Transport and Urban Development (TUD) COST Action TU 1304 **Wind energy technology reconsideration to enhance the concept of smart cities (WINERCOST)**
http://www.cost.eu/domains_actions/tud/Actions/TU1304.
3. Martí Boada Juncà. Member of the PNUMA (UNITED NATIONS Program for environment), member of the Commission of Communication and Education of UICN (International Union of Nature Conservation) and Global Forum 500 of United Nations.
4. Graham Mortyn. Member of the working group Past Global Changes (PAGES), Ocean2k project.
5. Albert Pèlach. Member of the International group L-TER (Long Term Ecological Research), node del Parc Nacional d'Aigüestortes i Estany de Sant Maurici.
6. Enric Mendizàbal i Riera. Laboratoire Dynamiques Rurales. Université de Toulouse-Jean Jaurès de 10/01/2015 a 14/02/2015. Corinne Eychenne, Maître de Conférences. Universidade do Porto de 2/05/2017-6/05/2017.

The multidisciplinary nature of the group allows the relationship between different Research Groups: Catalan, Spanish, European, and American. Researches that work on related topics. These relationships are an excellent opportunity to apply for joint projects in different calls. Stable relations from Geography (projects -P- and articles -A-) with related university groups:

Catalonia

- **Jordi Catalan, Sergi Pla** (CREAF-CSIC, UAB) and **Lluís Camarero** (director del CRAM y del CEAB-CSIC de Blanes), experts in ecology, members of the L-TER Aigüestortes (Long Term Ecological Research). **Rel. P-A.**
- **Ermengol Gassiot** expert in archeology in mountain areas (Prehistòria, UAB). **Rel. P-A.**
- **Francesc Burjachs**, palinòleg i expert in archeology in the Neolithic (IPHES de Tarragona). **Rel. P-A.**
- **Aaron Pérez Haase** botanic (Grup de Recerca Geobotànica i Cartografia de la Vegetació, GEOVEG, UB). **Rel. P-A.**
- **Jeroen van den Bergh** (ICTA, UAB), ICREA researcher, expert in economics and environment. **Rel. P.**
- **Louis Lemkow** (ICTA, UAB), (CU) expert in Geography, Sociology and Environmental Sciences. **Rel. P.**

Spain

- **Juan Carlos García Codron** geographer, expert in clima and environment (Universitat de Cantabria) **Rel. P-A.**

- **Ignacio García Amorena** forest engineer (Escuela Superior de Ingenieros Forestales de la UPM) **Rel. P-A.**
- **María José Prados** geographer (Universidad de Sevilla), expert in naturbanization and local development. **Rel. P-A.**
- **Joana Maria Seguí** geographer (Universitat de les Illes Balears) expert in mobility and transport. **Rel. P.**
- **Lorea Mendiola Egaña** environmental sciences, expert in environmental economics and econometrics (U del País Vasco). **Rel. P-A.**
- **Members of the RETURBAN IP coordinator (MPB)** (Red de Excelencia MINECO) - U Valencia, UAM, UAC, UA, U Las Palmas, U Lleida, U Zaragoza, U Pablo Olavide, U Alcalá de Henares.

Europe

- **Jean Paul Métaillié i Didier Galop** (Géographie de l'Environnement, GEODE, Université de Toulouse-le-Mirail) especialistes en història ambiental del Pirineu francès que ajuden a la formació del grup reben becaris del grup i amb qui hem tingut projectes de recerca els darrers 10 anys. **Rel. A.**
- **Laura Sadori** palinòloga (Universta de La Sapienza de Roma) que ajuda a la formació del grup en els projectes pirinencs i amb qui hi hagut intercanvi d'investigacions i participació en el programa Erasmus Teaching. **Rel. A.**
- **Corinne Eychenne** (UMR DYNAMIQUES RURALES, Université de Toulouse – Le Mirail), expert in economic development. **Rel. P.**
- **Johan Milian** (Dept. De Géographie de l'environnement, Aménagement des territoires de la Université Paris 8 Vincennes – Saint Denis), economic activity in protected natural areals and rural development. **Rel. P.**

United States

- **Oriol Marquet**, Post-Doc researcher, expert in healthy mobility Department of Parks, Recreation and Tourism Management College of Natural Resources. North Carolina State University (USA). **Rel. P-A.**
- **Yuko Aoyama**, Doctor. Faculty of Geography. Worcester University.

Latin America

- **Clecio Azevedo and Angela da Veiga Beltrame** (Univ. Federal Santa Catarina, Brasil) interchange of researchers in mobility and sostenibility topics. **Rel. A.**
- In topics: Wiland urban Interface, Biodiversity, Molitity, Quality of life have relationships with: Universidad de Sinaloa (US)- Universidad de Guadalajara, Departamento de Arquitectura (México), U. de Santiago de Chile (Chile), U. de Sao Paulo (USP, Brasil), U. Piloto (Bogotá) and U. de Buenos Aires, Instituto de Geografía, estudios rurales y de movilidad. **Rel. P-A**

There are other experts in climatic and environmental topics: M.A. Martinez-Boti (University of Southampton, UK); H. Goosse (UCL, Belgium); G. Kontakiotis (U. Athens, Greece); A. Antonarakou (U. Athens, Greece); M. Triantaphyllou (U. Athens, Greece); A. Incarbona (U. Palermo, Italy); L. Jonkers (U. Cardiff, UK); I. Hall (U. Cardiff, UK); A. Martinez-Garcia (ETH Zurich, Switzerland); G. Foster (U. Southampton, UK); G. Leduc (CEREGE, France); M. Verducci (U. Siena, Italy); J.C. Herguera (CICESE, Mèxic); M. Evans (U. Maryland, USA); D. Oppo (Woods Hole Oceanographic Institution, USA); D. Field (Hawaii Pacific U., USA); C. Charles (Scripps Institution of Oceanography, USA); G. Marino (Australian National University, Austràlia); L. Rodríguez-Sanz (Australian National University, Austràlia); H. McGregor (U. Wollongong, Austràlia).

D) Altres aspectes a destacar sobre l'activitat del grup

Other noteworthy aspects of the research activity

En aquest apartat heu d'explicar altres activitats o aspectes que vulgueu destacar del grup de recerca que no hàgiu explicat en apartats anteriors i que siguin d'especial interès per a l'àmbit o la línia de treball del grup de recerca. Podeu mencionar, per exemple, altres continguts com datasets, programari o evidències d'impacte social, així com altres continguts digitals, com ara la pàgina web del grup o les xarxes socials de la institució on apareguin altres activitats de recerca del grup (**2 pàgines com a màxim**) / *Explain any other activities or aspects you wish to highlight involving the research group that have not been covered in the previous sections and that are of special interest to the group's area of research. You may include, for instance, content such as data sets, software and evidence of social impact, and digital content such as the group's website or the social media profile of the institution where the research group's activities are posted (maximum 2 pages)*

1. Activities and aspects to highlight

Beside what has been said before, the Applied Geography group is Planning the enforce the societal relationship of the research to all levels of it by founding what is going to be called: **“AG Cocreation process to engage research and innovation to society.”**

This program will include members of society, members of universities, and it will have an agenda of different steps to create a route page including all concerns, of society to the AG group research and development. Then to transfer and disseminate the results back to the stakeholders involved in this project.

2. Data sets, and evidence of social impact

The group plans to create a web site. All other information about this part has been explained before in this proposal, sections C1, C2, C3, C4, C5.

Total Citations of the members of the Group Google Scholar 6.987.

Papers in indexed journals (2014-2017)

2014-2017	Q1	Q2	Q3	Q4
Papers in indexed journals	35	14	9	18

In topics: Geography, Physical Geography, Environmental Sciences, Urban Planning, Transportation or Sociology.

Participation in National and International Congresses

116 presentations to International congresses and 85 presentations to National congresses. The most relevant are:

- *Association of American Geographers* (2014, 2015, 2016 and 2017),
- *International Geographical Union* (2016),
- *Institute of British Geographers* -
- *I and II Hispano-Francés conference* (2016, 2017),
- *Coloquio Iberico de Geografía* (2015, 2016 and 2017),
- *Asociación de Geógrafos Españoles* (AGE) specific groups: Coloquio de Geografía Rural, Jornadas de campo y científicas del grupo de Geografía Económica, Geografía Urbana, Biogeografía y Desarrollo Local.
- *Risk Conference* (2017),
- *PAGES* (2015, 2015, 2016 and 2017),
- *Trobades d'Estudiosos del Montseny* (2014-2017),

- *Jornades del Parc Nacional i Estany de Sant Maurici (2014-2017).*

Others competitive R&D projects, ordered by the most recent:

- PALLARES-BARBERA, Montserrat, (IP). "Retos para las ciudades del siglo XXI: una agenda de investigación para la construcción de espacios urbanos sostenibles e innovadores", (CSO2016-81718-REDT) (2017-2018). Ministerio de Economía y Competitividad (MINECO). Núm. Members Researchers: 9. Amount awarded: 17.000 €.
- MIRALLES-GUASCH, Carme (IP). "Ciudad, calidad de vida y movilidad activa en la tercera edad", (2016ACUP05) (28/02/2017 - 27/02/2019). Recercaixa, Associació Catalana d'Universitats Públiques (ACUP), Num Members Researchers: 6. Amount awarded: 95.688,33€.
- TULLA, Antoni F. (IP). "L'agricultura social: anàlisi econòmica i avaluació del retorn a la societat (Social farming: economic analysis and return to society)" (2014ACUP00029).(01/03/2015 - 31/05/2017), Núm. Members Researchers: 10. Amount awarded: 77.835 €.
- TULLA, Antoni F. (IP). "L'agricultura social en el desenvolupament local i en l'ocupació per a col·lectius amb risc de marginació (Social farming in local development as an occupation for groups at risk of marginalization)" (2011ACUP00023).(1/02/2012 - 1/03/2014), Núm. Members Researchers: 9. Amount awarded: 70.762 €.

Participate in invited seminar talk (2014-2017):

- PALLARES-BARBERA, M. and DOT JUTGLA, E. (2017) "Urban transitions: Replacing traditional work practices in traditional workspaces". Presented at *Urban Studies Foundation Seminar Series: Reconceptualising Urban Landscapes of Work*. University of Portsmouth 20-21/04/2017.
- MIRALLES-GUASCH, C. (2016) "Tiempo, movilidad e igualdad de genero en clave territorial". Presented at opening conference in the Seminar of Programa de Naciones Unidas para el desarrollo de Montevideo (Uruguai): *Movilidad sustentable e igualdad de genero: aportes para pensar ciudades inclusives*.
- AVELLANEDA, P. (2016) "La ciudad dual. Algunas reflexiones sobre la dicotomía formalidad-informalidad en el transporte público" Quito-Barcelona: un diálogo entre Europa y América Latina". Ponencia "Habitat 3 Alternativo. IV EIMUS (Encuentro Iberoamericano de Movilidad Urbana Sostenible)". Quito (Ecuador).
- Cicle of conferences "50 anys Geografia Comarcal AEDOS" organized by *Societat Catalana de Geografia*. Participate Antoni F. TULLA, Enric MENDIZÀBAL and Carme MIRALLES (2016).
- MENDIZABAL, E. (2015) "La història de la població a Catalunya", seminar of the *Universitat Catalana d'Estiu* i realitzat a l'Institut d'Estudis Catalans (19/02/2015).
- MENDIZABAL, E. (2015) " La història del poblament i dels paisatges culturals de Catalunya", seminar of the *Universitat Catalana d'Estiu* i realitzat a l'Institut d'Estudis Catalans (24/02/2015).

Organization of workshops and seminars (2014-2017):

- Workshop: "Movilidad, espacio público y ciudad", Org. Àngel Cebollada and Pau Avellaneda, Universitat Autònoma de Barcelona (18/07/2015).
- Seminar: "La calidad de vida en un entorno urbano: Pontevedra" participate Sr. Miguel Anxo F. Lores, major of Pontevedra and Sr. César Mosquera, regidor del área de territorio de Pontevedra. Org. Montserrat Pallares-Barbera and Pau Avellaneda (12/02/2015).
- Workshop: COST Action TU1306 CyberParks - Barcelona Meeting – (26-28/11/2014). Org. Montserrat Pallares-Barbera, Ana Vera and Esteve Dot.

Software (2014-2017):

Cooperation with the firm Alemana PTV about the use of the software VISWALK para la micro simulación peatonal de los espacios públicos. Contact person Angel Cebollada and Israel Cabrera.

Awards (2014-2017):

- "Fundació del Món Rural" research award 2017 a Carles Guirado, Natàlia Valldeperas i Antoni F. Tulla, on the topic: L'Agricultura social a Catalunya, Desenvolupament local i ocupació per a col·lectius en risc d'exclusió social. Universitat de Lleida, 23/03/2017.
